Attention: JDRF Team Captains

Images Today and Beyond is pleased to once again offer professional walk team photographs at this year's 2009 Walk for the Cure on October 4, 2009 at Forest Park, St. Louis. Please take a moment to look at our order form on the reverse side.

As always, all teams are welcome to have their photograph taken no matter how large or small the team may be.

New this year will be our roving photographer. This photographer will be able to photograph any team with 15 or fewer members. The roving photographer will come to **YOUR** area to photograph your group. The advantages to using the roving photographer include not having to assemble and then move your group to our station and eliminates waiting in line for other groups to finish.

As in past years, we will still be set up near the main stage. Using risers and having a roped off area, we will be able to accommodate the large groups at this location.

We have our schedule and recommend you call our office to schedule a time slot. As always, scheduled teams will have first priority in having their photo taken. We will be available for group photography starting at 8 a.m. until race time. We will also be available after the race for teams who have put their name on the schedule.

It is highly recommended small groups intending to use our roving photographer also contact us and secure a time slot. Waiting till the day of the walk could easily result in a missed opportunity.

We look forward to hearing from you and working together toward the cure of juvenile diabetes. Call us today to secure a team photo time slot and response to questions you may have, 636.273.1145. Ask for Cheri or Dave.

Thank you,

Dave Myers
